Disable "LF will be replaced by CLRF" warning in Git on Windows

August 29, 2015 / 0 Comments / in [GIT](#) / by [mark](#)

If you've ever used Git in windows, you may have seen something like this every time you add files to Git:

```
1 warning: LF will be replaced by CRLF in www/index.htm
2 The file will have its original line endings in your
3 warning: LF will be replaced by CRLF in www/template:
4 The file will have its original line endings in your
```

If you want to turn it off, type this:

```
1 git config --global core.safecrlf false
```

Done.
